

```
import pandas as pd
```

```
df = pd.read_csv('data.csv')
```

```
pd.isnull(data["Team"])
```

```
df.dropna(inplace = True)
```

```
print(df.to_string())
```

11. Create a node.js file that Select all records from the "customers" table, and delete the specified record.

```
var mysql = require('mysql');
```

```
var con = mysql.createConnection({
```

```
  host: "localhost",
```

```
  user: "root",
```

```
  password: "nikhil96",
```

```
  database: "employee"
```

```
});
```

```
con.connect(function(err) {
```

```
  if (err) throw err;
```

```
  var sql = "DELETE FROM emp WHERE name = 'dada'";
```

```
  con.query(sql, function (err, result) {
```

```
    if (err) throw err;
```

```
    console.log("Number of records deleted: " + result.affectedRows);  
  });  
});
```
